

The Honorable Lauren King

IN THE UNITED STATES DISTRICT COURT  
FOR THE WESTERN DISTRICT OF WASHINGTON  
AT SEATTLE

STATE OF WASHINGTON, et al.,

Plaintiffs,

v.

DONALD J. TRUMP, et al.,

Defendants.

Case No. 2:25-CV-00244

**UNOPPOSED MOTION FOR  
LEAVE TO FILE BRIEF OF AMICI  
CURIAE BY AMERICAN  
ACADEMY OF PEDIATRICS AND  
ADDITIONAL NATIONAL AND  
STATE MEDICAL AND MENTAL  
HEALTH ORGANIZATIONS**

NOTE ON MOTION CALENDAR:  
February 25, 2025

Proposed *Amici Curiae* American Academy of Pediatrics and Additional National and State Medical and Mental Health Organizations hereby respectfully move for leave to file an amicus brief in support of Plaintiffs’ motion for preliminary injunction. Counsel for Plaintiffs and counsel for Defendants both consent to the motion. In furtherance of the motion, proposed *amici* state as follows:

Proposed *amici* are the American Academy of Pediatrics, the Academic Pediatric Association, the American Academy of Child & Adolescent Psychiatry, the American Academy of Nursing, the American College of Obstetricians and Gynecologists, the American College of Osteopathic Pediatricians, the American College of Physicians, the American Pediatric Society,

AAP ET AL.’S UNOPPOSED MOTION FOR  
LEAVE TO FILE BRIEF OF AMICI CURIAE  
No. 2:25-cv-00244-LJK- 1

**Miller Nash LLP**  
605 5th Avenue S | Suite 900  
Seattle, WA 98104  
206.624.8300 | Fax: 206.340.9599

1 the Association of American Medical Colleges, Association of Medical School Pediatric  
2 Department Chairs, Inc., the Minnesota Chapter of the American Academy of Pediatrics, the  
3 Oregon Chapter of the American Academy of Pediatrics, the Washington Chapter of the  
4 American Academy of Pediatrics, the Endocrine Society, the National Association of Pediatric  
5 Nurse Practitioners, the Pediatric Endocrine Society, the Society for Adolescent Health and  
6 Medicine, the Society of Pediatric Nurses, and the World Professional Association for  
7 Transgender Health (collectively, “*amici*”). *Amici* are a group of 19 professional medical and  
8 mental health organizations seeking to ensure that all individuals, including those with gender  
9 dysphoria, receive the optimal medical and mental healthcare they need and deserve. *Amici*  
10 include both national and state organizations and represent thousands of health care providers  
11 who have specific expertise with the issues raised in the amicus brief.

12 As a group of well-respected medical and mental health organizations, *amici* seek to offer  
13 this Court their scientific views and insights regarding the serious medical condition known as  
14 gender dysphoria; the widely-accepted view of the professional medical community that gender-  
15 affirming care is the appropriate treatment for individuals (and particularly adolescents) suffering  
16 from gender dysphoria; and the harm that effectively denying access to important  
17 gender-affirming medical care would cause to such individuals, as would be required by  
18 Executive Order No. 14187 (the “Healthcare Ban”).

19 *Amici* support Plaintiffs’ motion for a preliminary injunction. No counsel for a party  
20 authored the proposed brief in whole or in part, and no person other than *amici* or their counsel  
21 made any monetary contributions intended to fund the preparation or submission of the proposed  
22 brief. The Court should consider *amici*’s brief because it provides important expertise and  
23 addresses misstatements about the treatment for transgender adolescents. District courts have  
24 “broad discretion” regarding amicus participation and frequently welcome amicus briefs where,  
25 as here “the amicus has unique information that can help the court beyond the help that the  
26

1 lawyers for the parties are able to provide.” *Wagafe v. Biden*, 2022 WL 457983, at \*1 (W.D.  
2 Wash. Feb. 15, 2022) (internal quotes omitted).

3 By submitting an amicus brief in this matter, *amici* seek to assist this Court on an issue of  
4 great importance to many transgender individuals, including adolescents and their families, as  
5 well as the medical professionals who treat them, namely the prevention and treatment of gender  
6 dysphoria. Drawing on empirical research and *amici*’s extensive experience and expertise in their  
7 respective fields, the proposed amicus brief: (i) provides background on gender identity and  
8 gender dysphoria; (ii) describes the professionally accepted medical guidelines for treating  
9 gender dysphoria as they apply to adolescents, and the scientifically rigorous process by which  
10 these guidelines were developed; (iii) describes the evidence that supports the effectiveness of  
11 this care for adolescents with gender dysphoria; (iv) corrects inaccuracies in the purported basis  
12 for the Healthcare Ban; and (v) describe the irreparable harm that would be caused to adolescent  
13 patients if the Healthcare Ban is not enjoined. *Amici* thus fulfill the quintessential role for amicus  
14 curiae, and courts routinely authorize the filing of amicus briefs in such circumstances. *See, e.g.*,  
15 *Miller-Wohl Co. v. Comm’r of Labor & Indus. State of Mont.*, 694 F.2d 203, 204 (9th Cir. 1982)  
16 (describing the “classic role of amicus curiae” as “assisting in a case of general public interest,  
17 supplementing the efforts of counsel, and drawing the court’s attention” to matters that might  
18 otherwise escape consideration).

19 Courts regularly permit *amici* to file amicus curiae briefs to offer their unique expertise  
20 and insight on issues of physical and mental health and welfare, including with respect to  
21 transgender youth. For example, district courts in many states considering similar challenges to  
22 laws targeting gender-affirming care have accepted and cited amicus briefs filed by many of the  
23 same organizations that seek to file a brief here. *See, e.g., Brandt v. Rutledge*, 551 F. Supp. 3d  
24 882, 890 (E.D. Ark. 2021), *aff’d sub nom. Brandt by & through Brandt v. Rutledge*, 47 F.4th 661  
25 (8th Cir. 2022) (citing brief and observing “[t]he consensus recommendation of medical

1 organizations is that the only effective treatment for individuals at risk of or suffering from  
2 gender dysphoria is to provide gender-affirming care.”); *Eknes-Tucker v. Marshall*, 2022 WL  
3 1521889, at \*2 (M.D. Ala. May 13, 2022) (citing brief and observing that several major medical  
4 organizations “endorse these guidelines as evidence-based methods for treating gender dysphoria  
5 in minors.”); *see also Doe v. Thornbury*, Case No. 3:23-cv-00230, ECF No. 61 (W.D. Ky. June  
6 28, 2023) (granting motion for leave to file similar amicus brief); *Koe v. Noggle*, Case No. 1:23-  
7 cv-02904, ECF No. 104 (N.D. Ga. Aug. 11, 2023) (same); *Poe v. Drummond*, Case No. 4:23-cv-  
8 00177, ECF No. 72 (N.D. Okla. June 12, 2023) (same); *see also, e.g., Grimm v. Gloucester Cnty.*  
9 *Sch. Bd.*, 972 F.3d 586, 594 n.1 (4th Cir. 2020) (crediting “leading medical, public health, and  
10 mental health organization[.]” amici with helping the court to “develop[.] a fact-based  
11 understanding of what it means to be transgender”); *Adams by Kasper v. Sch. Bd. of St. Johns*  
12 *Cnty.*, 318 F. Supp. 3d 1293, 1298 n.14 (M.D. Fla. 2018) (granting leave to file an amicus brief  
13 in support of a transgender male student and noting that “the position of [amici] as to the  
14 appropriate standard of care for gender dysphoria is useful to understanding that diagnosis”).

15 Moreover, there is no downside to granting *amici*’s motion for leave to file the amicus  
16 brief. Courts have recognized that “it is preferable to err on the side of” permitting amicus briefs.  
17 *Neonatology Assocs., P.A. v. Comm’r*, 293 F.3d 128, 133 (3d Cir. 2002) (Alito, J.). This is so  
18 because “[i]f an amicus brief that turns out to be unhelpful is filed, the [court], after studying the  
19 case, will often be able to make that determination without much trouble and can then simply  
20 disregard the amicus brief.” *Id.* “On the other hand, if a good brief is rejected, the [court] will be  
21 deprived of a resource that might have been of assistance.” *Id.*

## 22 CONCLUSION

23 For the foregoing reasons, proposed *amici* respectfully request that this Court grant their  
24 motion for leave to file the attached amicus brief in support of Plaintiffs’ Motion for a  
25 Preliminary Injunction.

CORPORATE DISCLOSURE STATEMENT

INTRODUCTION ..... 1

ARGUMENT ..... 2

I. Understanding Gender Identity and Gender Dysphoria..... 3

II. The Widely Accepted Guidelines for Treating Adolescents with Gender  
Dysphoria Provide for Gender-Affirming Medical Care When Indicated. .... 4

A. The Gender Dysphoria Treatment Guidelines Include Thorough Mental  
Health Assessments and, for Some Adolescents, Gender-Affirming  
Medical Care. .... 4

1. The Guidelines Do Not Recommend Gender-Affirming Medical  
Care for Prepubertal Children. .... 5

2. A Robust Diagnostic Assessment Is Required Before Gender-  
Affirming Medical Care Is Provided. .... 6

3. In Certain Circumstances, the Guidelines Provide for the Use of  
Gender-Affirming Medical Care to Treat Adolescents With Gender  
Dysphoria. .... 7

B. The Guidelines for Treating Gender Dysphoria Were Developed Through  
a Robust and Transparent Process, Employing the Same Scientific Rigor  
That Underpins Other Medical Guidelines. .... 9

C. Scientific Evidence Indicates the Effectiveness of Treating Gender  
Dysphoria According to the Guidelines. .... 11

III. The Healthcare Ban Relies on Factually Inaccurate Claims and Ignores the  
Recommendations of the Medical Community. .... 12

IV. The Healthcare Ban Would Irreparably Harm Many Adolescents with Gender  
Dysphoria By Effectively Denying Them Access to the Treatment They Need. .... 14

CONCLUSION..... 15

1 **INTRODUCTION**

2 On January 28, 2025, President Donald Trump signed Executive Order No. 14187 (the  
3 “Healthcare Ban”), directing all federal agencies to “immediately take appropriate steps to ensure  
4 that institutions receiving Federal research or education grants end” gender-affirming medical care  
5 for people under nineteen, which as this brief describes is critical, medically necessary, evidence-  
6 based care for gender dysphoria.<sup>1</sup> Effectively denying such evidence-based medical care to  
7 adolescents who meet the requisite medical criteria puts them at risk of significant harm. Below,  
8 *amici* provide the Court with an accurate description of the relevant treatment guidelines and  
9 summarize the scientific evidence supporting the gender-affirming medical care for adolescents  
10 that is targeted in the Healthcare Ban.

11 Gender dysphoria is a condition that is characterized by clinically significant distress or  
12 impairment in social, occupational, or other important areas of functioning due to a marked  
13 incongruence between the patient’s gender identity (i.e., the innate sense of oneself as being a  
14 particular gender) and sex assigned at birth. See Jason Rafferty, *Ensuring Comprehensive Care  
15 and Support for Transgender and Gender-Diverse Children and Adolescents*, 142(4) *Pediatrics*  
16 e20182162, at 2 3 tbl.1 (2018), <https://perma.cc/DB5G-PG44> (“AAP Policy Statement”). If not  
17 treated, or treated improperly, gender dysphoria can result in debilitating anxiety, depression, and  
18 self-harm, and is associated with suicidality. As such, the effective treatment of gender dysphoria  
19 saves lives.

20 The medical community, including the respected professional organizations participating  
21 here as *amici*, widely recognizes that the appropriate protocol for treating gender dysphoria in  
22

---

23 <sup>1</sup> In this brief, the term “gender-affirming medical care” refers to the use of gonadotropin-releasing hormone  
24 (GnRH) analogues and/or hormone therapy to treat gender dysphoria. Because this brief focuses primarily on  
adolescents, it does not discuss surgeries that are typically available to transgender adults, nor does it discuss the  
treatment guidelines for gender dysphoria in transgender adults affected by the Healthcare Ban.

1 transgender adolescents is “gender-affirming care.” *Id.* at 10. Gender-affirming care is care that  
2 supports an individual with gender dysphoria as they explore their gender identity in contrast  
3 with efforts to change the individual’s gender identity to match their sex assigned at birth, which  
4 are known to be ineffective and harmful. *See* Christy Mallory et al., *Conversion Therapy and LGBT*  
5 *outh*, Williams Inst. (June 2019), <https://perma.cc/HY3-U2J>. For adolescents with persistent  
6 gender dysphoria that worsens with the onset of puberty, gender-affirming care may include  
7 medical care to align their physiology with their gender identity. Empirical evidence indicates that  
8 gender-affirming care, including the prescription of puberty blockers and hormone therapy to  
9 carefully evaluated patients who meet diagnostic criteria, can alleviate clinically significant  
10 distress and lead to significant improvements in the mental health and overall wellbeing of  
11 adolescents with gender dysphoria. *See* Simona Martin et al., *Criminalization of Gender-Affirming*  
12 *Care Interfering with Essential Treatment for Transgender Children and Adolescents*, 385 *New*  
13 *Eng. J. Med.* 579, at 2 (2021), <https://perma.cc/BR4F-YL5S>.

14 The Healthcare Ban disregards this medical evidence by effectively denying adolescents’  
15 access to treatments for gender dysphoria in accordance with the well-accepted protocol.  
16 Accordingly, *amici* urge this Court to grant Plaintiffs’ motion for a preliminary injunction.

### 17 ARGUMENT

18 This brief first provides background on gender identity and gender dysphoria. It then  
19 describes the professionally accepted medical guidelines for treating gender dysphoria as they apply  
20 to adolescents, the scientifically rigorous process by which these guidelines were developed, and the  
21 evidence that supports the effectiveness of this care for adolescents with gender dysphoria. Finally,  
22 the brief corrects inaccuracies regarding the professionally accepted medical guidelines for treating  
23 gender dysphoria and explains how the Healthcare Ban would irreparably harm adolescents with  
24 gender dysphoria by effectively denying access to crucial care for those who need it.

## I U ders a di Ge der Ide i a d Ge der D s h ria

Gender identity refers to a person’s deep internal sense of belonging to a particular gender. AAP Policy Statement at 2 tbl.1. Most people are “cisgender,” meaning they have a gender identity that aligns with their sex assigned at birth. Am. Psych. Ass’n, *Guidelines for Psychological Practice ith Transgender and Gender Nonconforming People*, 70(9) AMERICAN PSYCHOLOGIST 832, 861 862 (2015), <https://www.apa.org/practice/guidelines/transgender.pdf>. However, transgender people have a gender identity that does not align with their sex assigned at birth. *Id.* at 863. In the United States, approximately 1.6 million individuals identify as transgender. Jody L. Herman et al., *o Many Adults and outh Identify as Transgender in the nited States*, Williams Inst., at 2 (June 2022), <https://williamsinstitute.law.ucla.edu/wp-content/uploads/Trans-Pop-Update-Jun-2022.pdf>. Of these individuals, approximately 10 are teenagers aged 13 to 17. *Id.* at 3. Individuals often start to understand their gender identity during prepubertal childhood and adolescence.

Today, there is an increasing acceptance of being transgender as a normal variation of human identity. James L. Madara, *AMA to States Stop Interfering in ealthcare of Transgender Children*, Am. Med. Ass’n (Apr. 26, 2021), <https://www.ama-assn.org/press-center/press-releases/ama-states-stop-interfering-health-care-transgender-children>; Am. Psych. Ass’n, *APA Resolution on Gender Identity Change Efforts*, 4 (Feb. 2021), <https://www.apa.org/about/policy/resolution-gender-identity-change-efforts.pdf>. However, many transgender people suffer from gender dysphoria, a serious medical condition in which the patient experiences significant distress that can lead to “impairment in peer and/or family relationships, school performance, or other aspects of their life.” AAP Policy Statement at 5. Gender dysphoria is a formal diagnosis under the American Psychiatric Association’s Diagnostic and Statistical Manual (DSM-5-TR). Am. Psychiatric Ass’n, *Diagnostic and Statistical Manual of Mental*

AAP ET AL.’S PROPOSED  
BRIEF OF AMICI CURIAE - 3  
No. 2:25-cv-00244-LJK

**Miller Nash LLP**  
605 5th Avenue S | Suite 900  
Seattle, WA 98104  
206.624.8300 | Fax: 206.340.9599

1 *Disorders DSM- -TR* at 512 13 (2022); *see also* World Health Org., International Classification  
 2 of Diseases, Eleventh Revision (ICD-11) (2019/2021) (“Gender incongruence is characterised by  
 3 a marked and persistent incongruence between an individual’s experienced gender and the  
 4 assigned sex. Gender variant behaviour and preferences alone are not a basis for assigning the  
 5 diagnoses in this group.”).

6 If untreated or inadequately treated, gender dysphoria may lead to depression, anxiety, self-  
 7 harm, and suicidality. *See* Brayden N. Kameg & Donna G. Nativio, *Gender Dysphoria In outh*  
 8 *An ervice or Primary Care Providers*, 30(9) J. AM. ASS’N NURSE PRAC. 493 (2018),  
 9 <https://pubmed.ncbi.nlm.nih.gov/30095668>. In contrast, with treatment, transgender adolescents  
 10 with gender dysphoria can mature into thriving adults. *See infra* Section II.C.

## 11 **II The Widely Accepted Guidelines for Treating Adolescent Gender Dysphoria 12 Provide Gender-Affirming Medical Care When Indicated**

13 The widely accepted view of the professional medical community is that gender-affirming  
 14 care is the appropriate treatment for gender dysphoria and that, for some adolescents, puberty  
 15 blockers and hormone therapy are necessary. *See, e.g.*, Endocrine Soc’y, *Transgender Health An*  
 16 *Endocrine Society Position Statement* (2020), [https://www.endocrine.org/advocacy/position-](https://www.endocrine.org/advocacy/position-statements/transgender-health)  
 17 [statements/transgender-health](https://www.endocrine.org/advocacy/position-statements/transgender-health). Gender-affirming care greatly reduces the negative physical and  
 18 mental health consequences that result when gender dysphoria is untreated. *See id.*

### 19 **A The Gender Dysphoria Treatment Guidelines Include the Health 20 Health Assessment and Services for Adolescent Gender-Affirming Medical 21 Care**

22 The treatment protocols for gender dysphoria are laid out in established, evidence-based  
 23 clinical guidelines: (i) the Endocrine Society Clinical Practice Guideline for Endocrine Treatment  
 24 of Gender-Dysphoric/Gender-Incongruent Persons, and (ii) the WPATH Standards of Care for the  
 25 Health of Transgender and Gender Diverse People (together, the “Guidelines”). *See* Wylie C.

26 AAP ET AL.’S PROPOSED  
 BRIEF OF AMICI CURIAE - 4

 605 5th Avenue S | Suite 900  
 Seattle, WA 98104  
 206.624.8300 | Fax: 206.340.9599

1 Hembree et al., *Endocrine Treatment of Gender-Dysphoric/Gender-Incongruent Persons*, 102(11)  
 2 J. CLINICAL ENDOCRINOLOGY & METABOLISM 3869 (Nov. 2017) (“ES Guidelines”),  
 3 <https://academic.oup.com/jcem/article/102/11/3869/4157558>; WPATH, *Standards of Care for the*  
 4 *ealth of Transgender and Gender Diverse People* (8thVersion) (“WPATH Guidelines”),  
 5 <https://www.tandfonline.com/doi/pdf/10.1080/26895269.2022.2100644>. The Guidelines have  
 6 been developed by expert clinicians and researchers who have worked with patients with gender  
 7 dysphoria for many years.

8 The Guidelines provide that all youth with gender dysphoria should be evaluated,  
 9 diagnosed, and treated by a qualified health care professional (“HCP”). Further, the Guidelines  
 10 provide that each patient who receives gender-affirming care should receive only medically  
 11 necessary and appropriate care that is tailored to the patient’s individual needs and that is based on  
 12 the best evidence possible along with clinical experience. WPATH Guidelines at S16 S18; ES  
 13 Guidelines at 3872 73.

14 **The Guidelines Do Not Recommend Gender Affirming Medical Care**  
 15 **for Prepubertal Children**

16 For prepubertal children with gender dysphoria, the Guidelines provide for mental health  
 17 care and support for the child and their family, such as through psychotherapy and social  
 18 transitioning. WPATH Guidelines at S73 S74; ES Guidelines at 3877 78. (“Social transition”  
 19 refers to a process by which a child is acknowledged by others and has the opportunity to live  
 20 publicly, either in all situations or in certain situations, in the gender identity they affirm. WPATH  
 21 Guidelines at S75.) The Guidelines do *not* recommend that prepubertal children with gender  
 22 dysphoria receive puberty blockers, hormone therapy, or surgeries. WPATH Guidelines at S64,  
 23 S67; ES Guidelines at 3871.

24

**A R s Dia s i Assess e Is Re ired Be re Ge der  
A ir i Medi al Care Is Pr ided**

In contrast to prepubertal children, the Guidelines do contemplate the possibility that, for some transgender adolescents with gender dysphoria, gender-affirming medical care may be indicated, provided certain criteria are met. According to the Guidelines, puberty blockers and hormone therapy should be provided only after a thorough evaluation by a qualified HCP who: is licensed by their statutory body and holds a master’s degree or equivalent in a relevant clinical field; has expertise and received theoretical and evidence-based training in child, adolescent, and family mental health; has expertise and received training in gender identity development, gender diversity in children and adolescents, has the ability to assess capacity to consent, and possesses knowledge about gender diversity across the life span; has expertise and received training in autism spectrum disorders and other neurodevelopmental presentations, or collaborates with a developmental disability expert when working with neurodivergent patients; and continues engagement in professional development in areas relevant to gender diverse children, adolescents, and families. WPATH Guidelines at S49.

Prior to developing a treatment plan, the HCP should conduct a robust diagnostic assessment specifically, a “comprehensive biopsychosocial assessment” of the adolescent patient. *Id.* at S50. The HCP conducts this assessment to “understand the adolescent’s strengths, vulnerabilities, diagnostic profile, and unique needs,” so that the resulting treatment plan is appropriately individualized. *Id.* This assessment must be conducted collaboratively with the patient and their caregiver(s). *Id.*

I Cer ai Cir s a es he G ideli es Pr ide r he Use  
Ge der A ir i Medi al Care Trea Ad les e s Wi h Ge der  
D s h ria

For youth with gender dysphoria that continues into adolescence after the onset of puberty the Guidelines provide that, in addition to mental health care, gender-affirming medical care may be indicated. Before an adolescent may receive any gender-affirming medical care for treating gender dysphoria, a qualified HCP must make a determination that such medical care is indicated. The Guidelines collectively provide that, before prescribing puberty blockers, the HCP must determine that: (1) the adolescent meets the diagnostic criteria of gender dysphoria or gender incongruence according to an established taxonomy; ES Guidelines at 3876; WPATH Guidelines at S47, S48; (2) the adolescent has demonstrated a sustained and persistent pattern of gender nonconformity or gender dysphoria; (3) the adolescent has demonstrated the emotional and cognitive maturity required to provide informed consent for treatment; (4) any coexisting psychological, medical, or social problems that could interfere with diagnosis, treatment, or the adolescent’s ability to consent have been addressed; (5) the adolescent has been informed of the reproductive effects of treatment in the context of their stage in pubertal development and discussed fertility preservation options; and (6) the adolescent has reached Tanner stage 2 of puberty to initiate pubertal suppression. WPATH Guidelines at S59 65. Further, a pediatric endocrinologist or other clinician experienced in pubertal assessment must (7) agree with the indication for treatment, (8) confirm the patient has started puberty, and (9) confirm that there are no medical contraindications. ES Guidelines at 3878 tbl.5.

If all the above criteria are met, and the patient and their parents provide informed consent, gonadotropin-releasing hormone (GnRH) analogues, or “puberty blockers,” may be offered beginning at the onset of puberty. WPATH Guidelines at S61 62, S64; ES Guidelines at 3878 tbl.5; Simona Martin et al., *Criminalization of Gender-Affirming Care Interfering ith Essential*

AAP ET AL.’S PROPOSED  
BRIEF OF AMICI CURIAE - 7  
No. 2:25-cv-00244-LJK

605 5th Avenue S | Suite 900  
Seattle, WA 98104  
206.624.8300 | Fax: 206.340.9599

1 *Treatment for Transgender Children and Adolescents*, 385 New Eng. J. Med. 579, at 2 (2021),  
2 <https://perma.cc/BR4F-YL> S. The purpose of puberty blockers is to delay the development of  
3 permanent secondary sex characteristics which may result in significant distress for transgender  
4 youth until adolescents are old enough and have had sufficient time to make more informed  
5 decisions about whether to pursue further treatments. WPATH Guidelines at S112. Puberty  
6 blockers also can make pursuing transition later in life easier, because they prevent irreversible  
7 bodily changes such as protrusion of the Adam’s apple or breast growth. *See* AAP Policy Statement  
8 at 5. Puberty blockers have well-known efficacy and side-effect profiles. *See* Martin, 385 New  
9 Eng. J. Med. 579, at 2. Their effects are generally reversible, and when a patient discontinues their  
10 use, the patient resumes endogenous puberty. *See id.* In fact, puberty blockers have been used by  
11 pediatric endocrinologists for more than 40 years for the treatment of precocious puberty. *See* F.  
12 Comite et al., *Short-Term Treatment of Idiopathic Precocious Puberty with a Long-Acting*  
13 *Analogue of Luteinizing hormone-Releasing hormone: A Preliminary Report*, 305 NEJM 1546  
14 (1981). The risks of any serious adverse effects from puberty blockers are exceedingly rare when  
15 provided under clinical supervision. *See, e.g.,* Annemieke S. Staphorsius et al., *Puberty*  
16 *Suppression and Executive Functioning*, 6 PSCYHONEUROENDOCRINOLOGY 190 (2015),  
17 <https://pubmed.ncbi.nlm.nih.gov/25837854> (no adverse impact on executive functioning); Ken C.  
18 Pang et al., *Long-term Puberty Suppression for a Nonbinary Teenager*, 145(2) PEDIATRICS  
19 e20191606 (2019), [https://watermark.silverchair.com/peds\\_20191606.pdf](https://watermark.silverchair.com/peds_20191606.pdf) (exceedingly low risk  
20 of delayed bone mineralization from hormone treatment).

21 Later in adolescence and if the criteria below are met hormone therapy may be used to  
22 initiate puberty consistent with the patient’s gender identity. *See* Martin, 385 New Eng. J. Med.  
23 579, at 2. Hormone therapy involves using gender-affirming hormones to allow adolescents to  
24 develop secondary sex characteristics consistent with their gender identity. *See* AAP Policy

25 AAP ET AL.’S PROPOSED  
26 BRIEF OF AMICI CURIAE - 8  
No. 2:25-cv-00244-LJK

**Miller Nash LLP**  
605 5th Avenue S | Suite 900  
Seattle, WA 98104  
206.624.8300 | Fax: 206.340.9599

1 Statement at 6. Hormone therapy is only prescribed when a qualified HCP has confirmed the  
 2 persistence of the patient’s gender dysphoria, the patient’s mental capacity to consent to the  
 3 treatment, and that any coexisting problems have been addressed. Endocrine Soc’y Guidelines at  
 4 3878 tbl.5. A pediatric endocrinologist or other clinician experienced in pubertal induction must  
 5 also agree with the indication, and the patient and their parents must be informed of the potential  
 6 effects and side effects and give their informed consent. *See id.* Although some of the changes  
 7 caused by hormone therapy become irreversible after those secondary sex characteristics are fully  
 8 developed, others are partially reversible if the patient discontinues use of the hormones. *See AAP*  
 9 *Policy Statement* at 5 6.

10 The Guidelines contemplate that the prescription of puberty blockers and/or hormone  
 11 therapy be coupled with education on the safe use of such medications and close monitoring to  
 12 mitigate any potential risks. *See Endocrine Soc’y Guidelines* at 3871, 3876. Decisions regarding  
 13 the appropriate treatment for each patient with gender dysphoria are made in consultation with the  
 14 patient, their parents, and the medical and mental health care team. There is “no one-size-fits-all  
 15 approach to this kind of care.” Martin, 385 New Eng. J. Med. 579, at 1.

16 **B The Guidelines for Treatment of Gender Dysphoria Were Developed Through a  
 17 Reasonable and Transparent Process Unlike the Same Issue in Other  
 18 Under Other Medical Guidelines**

18 The Guidelines are the product of careful and robust deliberation following the same types  
 19 of processes and subject to the same types of rigorous requirements as other guidelines  
 20 promulgated by amici and other medical organizations with respect to other areas of medicine,  
 21 such as treatments for cancer, diabetes, or cardiovascular disease.

22 For example, the Endocrine Society Guidelines were developed following a 26-step, 26-  
 23 month drafting, comment, and review process. *See, e.g., Endocrine Soc’y Guidelines* at 3872 73.  
 24 The Endocrine Society imposed strict evidentiary requirements based on the internationally

1 recognized Grading of Recommendations Assessment, Development and Evaluation (GRADE)  
2 system. *See* Gordon Guyatt et al., *GRADE Guidelines* . *Introduction - GRADE Evidence Profiles*  
3 *and Summary of Findings Tables*, 64 J. CLINICAL EPIDEMIOLOGY 383 (2011),  
4 <https://perma.cc/RE29-T37>. That GRADE assessment was then reviewed, re-reviewed, and  
5 reviewed again by independent groups of professionals. Endocrine Soc’y, *Methodology*,  
6 <https://www.endocrine.org/clinical-practice-guidelines/methodology>. Reviewers were subject to  
7 strict conflict of interest rules, and there was ample opportunity for feedback and debate through  
8 the years-long review process. *See id.* Further, the Endocrine Society continually reviews its own  
9 guidelines and recently determined that the 2017 transgender care guidelines continue to reflect  
10 the best, most up-to-date available evidence. *See* Endocrine Soc’y, Endocrine Soc’y Statement in  
11 Support of Gender-Affirming Care (May 8, 2024), <https://perma.cc/J4Y2-RUJ2>.

12 First published in 1979, the WPATH Standards of Care are currently in their 8th Edition.  
13 The current Standards of Care are the result of a robust drafting, comment, and review process that  
14 collectively took five years. *See* WPATH Guidelines at S247-51. The draft guidelines went  
15 through rigorous review and were publicly available for discussion and debate, receiving a total of  
16 2,688 comments. *See id.* There were 119 authors ultimately involved in the final draft, including  
17 feedback from experts in the field as well as from transgender individuals and their families. *See*  
18 *id.* Inclusion of input from the relevant patient population during development of medical  
19 guidelines adheres to national standards and best practices. *See* National Academy of Sciences,  
20 *Clinical Practice Guidelines We Can Trust* at 89-92 (2011), <https://perma.cc/479-TGW3>. Each  
21 recommendation in the Standards of Care was formally approved using the Delphi process, *see*  
22 WPATH Guidelines at S247-51, which is one of the most commonly adopted consensus  
23 development strategies for medical clinical practice guidelines, *see* National Academy of Sciences,  
24 *Clinical Practice Guidelines We Can Trust* at 88 (2011).

C S i e i i E i d e e I d i a e s h e E e i e e s s T r e a i G e n d e r D s h r i a  
A r d i h e G i d e l i e s

Multiple studies indicate that adolescents with gender dysphoria who receive gender-affirming medical care experience improvements in their overall well-being. These studies find positive mental health outcomes for those adolescents who received puberty blockers or hormone therapy, including statistically significant reductions in anxiety, depression, and suicidal ideation.

For example, a longitudinal study of nearly 50 transgender adolescents found that suicidality was decreased by a statistically significant degree after receiving gender-affirming hormone treatment. Luke R. Allen et al., *Well-Being and Suicidality Among Transgender Youth After Gender-Affirming Hormones*, 7(3) CLINICAL PRAC. PEDIATRIC PSYCH. 302 (2019), <https://psycnet.apa.org/record/2019-52280-009>. A study published in January 2023, following 315 participants ages 12 to 20 who received gender-affirming hormone treatment, found that the treatment was associated with decreased symptoms of depression and anxiety. Diane Chen et al., *Psychosocial Functioning in Transgender Youth after Years of Hormones*, 388(3) NEJM 240-250 (2023). Additionally, a 2020 study analyzed survey data from 89 transgender adults who had access to puberty blockers while adolescents and from more than 3,400 transgender adults who did not. Jack L. Turban et al., *Access To Gender-Affirming Hormones During Adolescence and Mental Health Outcomes Among Transgender Adults*, J. PLOS ONE (2022), <https://perma.cc/4VEK-7M8N>. The study found that those who received puberty blocking treatment had lower odds of lifetime suicidal ideation than those who wanted puberty blocking treatment but did not receive it, even after adjusting for demographic variables and level of family support. *Id.* Approximately *nine in ten* transgender adults who wanted puberty blocking treatment but did not receive it reported lifetime suicidal ideation. *Id.*

1 Further, a prospective two-year follow-up study of adolescents with gender dysphoria  
 2 published in 2011 found that treatment with puberty blockers was associated with decreased  
 3 depression and improved overall functioning. Annelou L.C. de Vries et al., *Puberty Suppression*  
 4 *In Adolescents With Gender Identity Disorder*, 8(8) J. SE UAL MED. 2276 2283 (2011),  
 5 <https://pubmed.ncbi.nlm.nih.gov/20646177>. A six-year follow-up study of 55 individuals from  
 6 the 2011 study found that subsequent treatment with hormone therapy followed by surgery in  
 7 adulthood was associated with a statistically significant decrease in depression and anxiety.  
 8 Annelou L.C. de Vries et al., *Young Adult Psychological Outcome After Puberty Suppression And*  
 9 *Gender Reassignment*, 134(4) PEDIATRICS 696 704 (2014),  
 10 <https://pubmed.ncbi.nlm.nih.gov/25201798>. “Remarkably, this study demonstrated that these  
 11 transgender adolescents and young adults had a sense of well-being that was equivalent or superior  
 12 to that seen in age-matched controls from the general population.” Stephen M. Rosenthal,  
 13 *Challenges in the Care of Transgender and Gender-Diverse Youth An Endocrinologist’s View*,  
 14 17(10) NATURE REV. ENDOCRINOLOGY 581, 586 (Oct. 2021),  
 15 <https://pubmed.ncbi.nlm.nih.gov/34376826>.

16 As clinicians and scientific researchers, amici always welcome more research, including  
 17 on this crucial topic. However, the available data indicate that the gender-affirming medical care  
 18 targeted in the Healthcare Ban is effective for the treatment of gender dysphoria.

19 **III The Healthcare Ban Relies on False and Unsupported Claims and  
 20 Respects the Medical Community**

21 In attempting to justify effectively denying access to gender-affirming medical care, the  
 22 Healthcare Ban makes claims which are factually incorrect and contradicted by the available  
 23 scientific evidence. In particular, the Healthcare Ban states that “[c]ountless children soon regret”  
 24 receiving gender-affirming medical care. Exec. Order No. 14187 1. The Healthcare Ban

25 AAP ET AL.’S PROPOSED  
 26 BRIEF OF AMICI CURIAE - 12  
 No. 2:25-cv-00244-LJK

**Miller Nash LLP**  
 605 5th Avenue S | Suite 900  
 Seattle, WA 98104  
 206.624.8300 | Fax: 206.340.9599

1 improperly conflates prepubertal children with adolescents, which is an important distinction, as  
2 prepubertal children are not eligible under the Guidelines for any of the gender-affirming medical  
3 care targeted in the Healthcare Ban. *See* Susan D. Boulware et al., *Biased Science The Texas and*  
4 *Alabama Measures Criminalizing Medical Treatment for Transgender Children and Adolescents*  
5 *Rely on Inaccurate and Misleading Scientific Claims*, 1, 18 (Apr. 28, 2022),  
6 [https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=4102374](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=4102374). The Guidelines endorse the use of  
7 this medical care only to treat adolescents and adults with gender dysphoria, and only when the  
8 relevant criteria are met. *See* Endocrine Soc’y Guidelines at 3871, 3879; WPATH Guidelines at  
9 S32, S48.

10 There are *no* studies to support the proposition that adolescents with gender dysphoria are  
11 likely to later identify as their sex assigned at birth, whether they receive treatment or not. *See,*  
12 *e.g.*, Stewart L. Adelson, *Practice Parameter on Gay, Lesbian, or Bisexual Sexual Orientation,*  
13 *Gender Non-Conformity, and Gender Discordance in Children and Adolescents*, 51 J. AM. ACAD.  
14 CHILD & ADOLESCENT PSYCHIATRY 957, 964 (2020), <https://pubmed.ncbi.nlm.nih.gov/22917211>.  
15 On the contrary, “[l]ongitudinal studies have indicated that the emergence or worsening of gender  
16 dysphoria with pubertal onset is associated with a very high likelihood of being a transgender  
17 adult.” Rosenthal, NATURE REV. ENDOCRINOLOGY 581, 585.

18 Moreover, while detransitioning may occur for many reasons, detransitioning is not the  
19 same as regret. The Healthcare Ban incorrectly assumes that an individual who detransitions the  
20 definition of which varies from study to study must do so because they have come to identify  
21 with their sex assigned at birth. *See* Michael S. Irwig, *Detransition Among Transgender and*  
22 *Gender-Diverse People An Increasing and Increasingly Complex Phenomenon*, J. CLINICAL  
23 ENDOCRINOLOGY & METABOLISM 1, 1 (June 2022), <https://pubmed.ncbi.nlm.nih.gov/35678284>  
24 (“Detransition refers to the stopping or reversal of transitioning which could be social (gender

25 AAP ET AL.’S PROPOSED  
26 BRIEF OF AMICI CURIAE - 13  
No. 2:25-cv-00244-LJK

**Miller Nash LLP**

Seattle, WA 98104  
206.624.8300 | Fax: 206.340.9599

1 presentation, pronouns), medical (hormone therapy), surgical, or legal.”). This ignores other, more  
 2 commonly reported factors that contribute to a person’s choice to detransition, such as pressure  
 3 from parents and discrimination. *See id.* (discussing “largest study to look at detransition”).

4 In addition, while the percentage of adolescents seeking gender-affirming care has  
 5 increased, that percentage remains very low only 1.8 of high-school students identify as  
 6 transgender, *see* Michelle M. Johns et al., *Transgender Identity and Experiences of Violence*  
 7 *Victimization, Substance Use, Suicide Risk, and Sexual Risk Behaviors Among High School*  
 8 *Students States and Large Urban School Districts*, HHS/CDC, 68 MORBIDITY &  
 9 MORTALITY WKLY. REP. 67, 68 (2019), <https://www.cdc.gov/mmwr/volumes/68/wr/pdfs/mm6803a3-H.pdf>, and only a small fraction of transgender  
 10 adolescents are prescribed gender-affirming medical care, *see* Landon D. Hughes, Brittany M.  
 11 Charlton, Isa Berzansky, *Gender-Affirming Medications Among Transgender Adolescents in the*  
 12 *U.S.*, *JAMA PEDIATR.* (Jan. 6, 2025), <https://pubmed.ncbi.nlm.nih.gov/39761053/>  
 13 (finding that less than 0.1 of transgender adolescents are prescribed puberty blockers or hormone  
 14 therapy by examining private insurance claims over 5 years). Further, research supports that this  
 15 increase in adolescents seeking care is very likely the result of reduced social stigma and expanded  
 16 care options. *See* Boulware, 20.

18 **IV The Healthcare Ban Would Irrevocably Harm Many Adolescent Gender**  
 19 **Discrimination: Evidence of the Access to the Treatment They Need**

20 The Healthcare Ban effectively denies adolescents with gender dysphoria throughout the  
 21 United States access to medical care that is designed to improve health outcomes and alleviate  
 22 suffering and that is grounded in science and endorsed by the medical community. The gender-  
 23 affirming medical care targeted in the Healthcare Ban can be a crucial part of treatment for  
 24 transgender adolescents with gender dysphoria and necessary to preserve their health. Clinicians

25 AAP ET AL.’S PROPOSED  
 26 BRIEF OF AMICI CURIAE - 14  
 No. 2:25-cv-00244-LJK

**Miller Nash LLP**  
 605 5th Avenue S | Suite 900  
 Seattle, WA 98104  
 206.624.8300 | Fax: 206.340.9599

1 who are members of the relevant *amici* associations have witnessed the benefits of this treatment  
2 as well as the harm that results when such treatment is denied or delayed.

3 As discussed above, research shows that adolescents with gender dysphoria who receive  
4 puberty blockers and/or hormone therapy experience less depression, anxiety, and suicidal  
5 ideation. Several studies have found that hormone therapy is associated with reductions in the rate  
6 of suicide attempts and significant improvement in quality of life. *See* M. Hassan Murad et al.,  
7 *Hormonal Therapy and Gender Reassignment: A Systematic Review and Meta-Analysis of Quality of*  
8 *Life and Psychosocial Outcomes*, 72(2) CLINICAL ENDOCRINOLOGY 214 (Feb. 2010),  
9 <https://onlinelibrary.wiley.com/doi/10.1111/j.1365-2265.2009.03625.x>; Jack L. Turban et al.,  
10 *Access To Gender-Affirming Hormones During Adolescence and Mental Health Outcomes Among*  
11 *Transgender Adults*, J. PLOS ONE (2022), <https://perma.cc/4VEK-7M8N>. In light of this evidence  
12 supporting the connection between lack of access to gender-affirming medical care and lifetime  
13 suicide risk, banning such care can put patients' lives at risk.

14 **CONCLUSION**

15 For the foregoing reasons, the Court should grant Plaintiffs' motion for a preliminary  
16 injunction.

1 Dated: February 25, 2025

Respectfully submitted,
