ENDOCRINE EDUCATION CASES FLASHCARDS

These handheld flashcards provide concise, case-based guidance to build confidence in identifying, treating, and managing endocrine diseases. In addition, this fully illustrated guide features a compact design, making it easier to reference recommendations on the major topic areas of endocrine care.

Each topic area has its own set of cards with several bindings, so you can customize your deck with different sets to suit your specific needs.

The front of each card contains a clinical case and questions, while the back includes an answer discussion to demonstrate problem-solving as an endocrinologist.

Topics covered include:

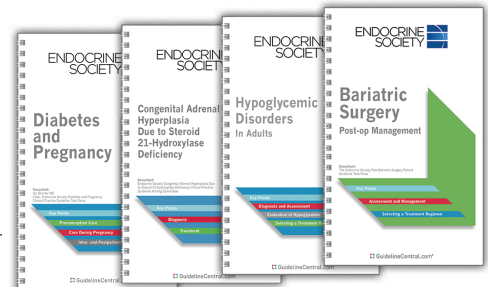

- Adrenal
- Bone
- Diabetes
- Lipids
- Obesity
- Pituitary
- Reproduction
- Thyroid

For more information, visit www.endocrine.org/store/medical-instruments-and-models/residency-cards--educational-pocket-guide. Content provided digitally to maximize reformatting options by client.

CLINICAL PRACTICE GUIDELINE POCKET GUIDES

Practical quick-reference pocket guides to help you make accurate clinical decisions at the point of care. Each Pocket Guide could include Key Points, Diagnosis, and Treatment related to the topic.

CLINICAL PRACTICE GUIDELINE SLIDE DECKS

The Endocrine Society is dedicated to providing the field of endocrinology with timely, evidence-based recommendations for clinical care and practice. New slide decks are continually published and updated to reflect the changing clinical science and better meet the needs of practicing physicians and healthcare professionals.

WEBINARS

Features video files from webinars that Endocrine Society holds throughout the year on many topics, from clinical practice and basic research to career development, advocacy, and more.
